 My Background, Short Version 72

The Purpose of this Book

What I'm going to attempt to do in this book is show you the 184 year path from the publication of Karl Marx's Manifesto to the end of our Republic projected to be 2032 by Martin Armstrong's Economics Confidence Model (ECM). What follows this introduction is a listing of historical events, published books and papers, and comments listed from the American Revolution in 1776 to the date of this book in March 2024. They are presented in color coded groupings. we have **War in Red**, **Government in Blue** and **Marxism in Dark Blue**. If the listing is a book or paper, I have either read it or wrote it. The complete listing back to 776 BC is shown at the end of this book. The listings are in date order with the color code to create related categories.

What follows next are the key elements of the period after the formation of the United States of America. But keep in mind when you read this that that the story actually goes all the way back to 776 BC and contains many other factors besides the three factors we look at to keep it as simple as possible. The full list of factors from 776BC to the present is at the end in the annex.

From 2020 through 2023, the southern border has been wide open and over 9,000,000 migrants are now in the country illegally which is over 8,000 per day. By Election Day 2024 another 13,720 will be in the country putting the total for 4 years around 12,000,000.

Many of these illegals will be able to vote by Presidential executive orders but the real effort to stop Trump is the use of Lawfare. Which is using made up laws to try and take all his money and put him in jail? All the fake (Lawfare) cases Jack Smith is using will be thrown out by the Supreme Court if they are honest. President Trump is clearly going to be the republican candidate and winner of the 2024 election based on current polls as no one likes Biden. The question will be, will the democrats do to Trump in 2024 what they did to John F. Kennedy, one of their own, in 1963?

Key points in American history from the Signing of the Constitution & Bill and Rights to the present

Declaration of independence and Revolutionary war 1776

Pastors or Priests were part of the final battels leading the civilian irregular troops.

Elementary schools along with home schooling were common in the New England states from the beginning mostly from the churches so the children could read the bible. Then Colleges were established lastly Public schools followed so that by the time of the revolutionary War Americans was the most literate in the world.

Signing of the United States Constitution creating the Republic occurred on September 17, 1787

The Bill of Rights containing 10 amendments to the Constitution Ratified December 15, 1791

The War of 1812 to 1815 was a result of the British interfering with American trade with France during their revolution.

The Communist Manifesto by Karl Marx published 1848

By the time of the US Civil war Horace Man had establish the principle of Common schools for everyone financed by public taxes. As well has the training of the teachers. One of his key points was teaching by age eliminating everyone in one room.

On The Origin of the Species by Charles Darwin published in 1859

The Civil War to end slavery Day by Day an Almanac 1861 – 1865 By E. B. Long with Barbara Long published in 1971

Capital Volume I by Karl Mark published 1867

Capital Volume II by Karl Mark Published by Engles 1885

Capital Volume III by Karl Mark Published by Engles 1894

By the end of the 19th century, women had taking over the role of elementary education educators and supervisors of American moral and ethical values. And elementary education was mandatory in most states for our chordin.

Creation of the Federal Reserve System in 1913

16th Amendment to Constitutional allow a head tax (income tax) in 1913

17th Amendment to Constitutional for direct election of Senators in 1913

The Great War (WW I) 1914 to 1918

Toward the end of WW I the Marxists took over Russia in 1917, killed the Czar and all his family, and created the first Marxist state by 1927 after defeating the White Russian's.

19th Amendment to Constitutional women's right to vote in 1920

The start of the Eugenics movement in the US was between 1920 to 1930 and was based on Darwin theory of survival of the fittest.

Margaret H. Sanger opened first birth control clinic in 1916 which became Planned Parenthood in 1921

Science and Marxism (Progressivism) takes off from late 1800's through 1920's

Following Russia China starts the path to communism in 1921

Creation of the Council on Foreign Relations `1921

Stalin took over Russia in 1927 and created a hell on earth until he died in 1953 as documented in the Gulag Archipelago series written by Aleksandr I. Solzhenitsyn and released to the world in the 1970's.

Creation of the Bank of International Settlements (BIS) 1930

Creation of the Technocracy group at Columbia University in 1932

Brave New World Aldous Huxley published 1932

FDR brings socialism to America with the New Deal programs after taking office in 1933

FDR creates Social Security system 1935

World War II 1939 to 1945

The first atomic bombs were used to end the war

By the end of WW II the first jet engines were flying

Creation of The World Bank in Brenton Woods in 1944

Animal Farm George Orwell 1945

Creation of the International Monetary Fund (IMF) 1945

Mao ta song and the CCP take over China and the survivors of the war are driven to Taiwan in 1946. From then to the 1990's China used a system of government much like that of Russia.

Everson v. Board of Education Supreme Court rules public money could not be used to Bus kids to religious schools 1947

Formation of the USA Central Intelligence Agency in by Harry Truman 1947

1984 George Orwell, published in 1949

Korean War 1950 to 1953

The origins of Totalitarianism Hannah Arendt published 1950

Marxism Unmasked Ludwig Von Mises published 2006 written in 1952

Vietnam War 1952 to 1975

Creation of US Department of Health & Human Services 1953

President Kennedy allowed the federal government employs to form a union by Executive order 10988 on January 17, 1962.

Assassination of President John F, Kennedy on November 22, 1963 that made Vice President Lyndon B. Johnson the President

Beginning of the feminist movement in the US as part of the protests of the Vietnam War 1964

Creation of the Department of Housing and Urban Development 1965

Immigration Act of 1965 changed the makeup of America by putting an end to long-standing national-origin quotas that favored those from Northern and Western Europe to those in central and South America and also India and Asia. There was also a Family Reunification rule that brought entire families in to the U. S. in mass.

Johnson also passed a law that if Pastors or Priests could not get into politics or they would lose their Tax exemption.

Because of the Vietnam War that Johnson created, he created massive demonstrations and so he did not run for a second term in 1968 during his 5 years in office he recommended and signed an amazing amount of legislation. Those programs eventually destroyed the black family and killed 58,148 Americans in Vietnam.

Creation of the Department of Transportation 1966

Start of the public Lesbian gay Bi movement in 1970's

Creation of the Occupational Safety and Health Act 1970

Rules for Radicals Saul D. Alinsky published 1971

26th Amendment to Constitution lowers voting age to 18 1971

Formation of the World Economic Forum (WEF) 1971

The Best and the Brightest David Halberstam published in 1972 (Vietnam)

The Gulag Archipelago an Experiment in Literary Investigation Aleksandr I. Solzhenitsyn 1973

Creation of the Trilateral Commission 1973

The Gulag Archipelago Two The Destructive Labor Camps The Soul and Barbed Wire Aleksandr I. Solzhenitsyn published 1974

Obedience To Authority Stanley Milgram published 1974

Prairie Fire The politics of Revolutionary Anti-Imperialism a Political Statement of the Weather Underground published on May 7 1974

The Gulag Archipelago Three Katorga Exile Stalin Is No More Aleksandr I. Solzhenitsyn 1976

Creation of the Department of Energy 1977

Creation of the Department of Education 1979

The Five Thousand Year Leap W. Cleon Skousen published 1981

Roots of Strategy Edited by Gen T, R, Phillips and published in 1985

Makers of modern Strategy from Machiavelli to the Nuclear Age edited by Peter Paret published 1986

Critical Race theory (CRT) started in 1989

Dissolution of the Soviet Union 1982 to 1991 and the cold war with Russia over Marxism had failed

Un Agenda 21 and sustainable Development 1992

In Retrospect The Tragedy and Lessons of Vietnam Robert S. McNamara with Brian VanDeMark published 1995

Diary of a Special Forces Trooper in Vietnam , 1967 by David John Pristash on July 31 1996

Transgender movement gains support in1996

The fourth Turning William Strauss and Neil Howe published in 1997

War on Terror (9/11) 2001 to 2021

USA Patriot Act 2001 This was a major set of policies with significant constitutional issues

China is allowed to join the World Trade Organization (WTO) in Dec 2001

WTC attack on September 11, 2001Book by David John Pristash published October 2001

Creation of the Department of Homeland Security as part of the Patriot Act 2002

Space X created to design and build advanced space Craft by Elon Musk in 2002

Green Hell How Environmentalists Plan to Control your Life and What You Can Do to Stop Them by Steve Milloy published in 2009

Constitution for the New Socialist Republic in North America from the revolutionary Communist Party, USA Published by RDP Publications 2010

Creation of the Obama's Affordable Care Act 2010 removing doctors from the health care system

The Ruling Class How They Corrupted America and What We Can Do About It by Angelo M, Codevilla published in 2010

Intellectuals and Society, By Tomas Sowell (one of the great Black economists) published in 2011

On Politics Two Book set, Alan Ryan published 2012 (2500 years of history)

Vietnam Labyrinth Tran Ngoc Chau with Ken Fermoye Allies, enemies & why the U.S. lost the war (one of the best books ever written on the Vietnam War) published in 2012

Black Lives mater (BLM) 2013 ----

Culturism Why African-American Must Stop Blaming Racism for their Problems and Start Taking Full Responsibility by Scott Hampton published in 2013

Is Administrative Law Unlawful? Philip Hamburger published 2014

Technocracy Rising Patrick M Wood published 2015

The Devils Chessboard, Allen Dulles the CIA and the Rise of Americas Secret Government By David Talbot published in 2015

The hundred –Year Marathon China's Secret Strategy to Replace America as the Global Superpower by Michael Pillsbury published in 2015

The Fourth Industrial Revolution Klaus Schwab published 2016

The end of policing (defund the police) became popular after the book the End of Policing was published in 2017

Technocracy The Hard Road to World Order Patrick M. Wood Published 2018

The Diversity Delusion How Race and Gender Pandering Corrupt the University and Undermine Our Culture Heather Mac Donald published in 2018

An Essay on Moral Philosophy in Western Civilization by David John Pristash published in January 2019

Creation of Star Link by Elon Musk to put thousands of small satellites in low earth orbit in for better communication the first launch was in 2019

When the riots about George Floyds death started in May of 2020 De fund the police was started in many cities. We also had hundreds of riots and fires that destroyed billions of dollars' worth of property

COVID-19 The Great Reset Klaus Schwab & Thierry Malleret published 2020

The election of Biden in 2020 was done by complex and illegal modifications to the election system by the Democrats in key states with the approval of The Republican party. No previous President every lost an election on the 2nd term when he got significantly more votes than the first time while the opponent hid in the basement.

Red Handed How American Elites Get Rich Helping China Win Peter Schweizer published in 2022

Government Gangsters Kash Pramod Patel published 2023

Founding Partisans Brawling Birth of American Politics H, W. Brands published 2023

Why Write this Now?

Well, what triggered me to write this book was the last Key Point on page 13 of the previous section. That book is *Founding Partisans Brawling Birth of American Politics* written by H, W. Brands and it was published in 2023. In that book, the story was the battle between Hamilton Madison Jefferson and Adams; one faction for bigger federal government and the other for less federal government; the Federalists and the Anti-Federalists. That battle is still going on today as the Federalists are now the UniParty (both Democrats and Republicans) versus the new MAGA party that adopted Trump in 2016; after Mitch McConnell (Republican) destroyed the Tea Party in 2012. Trump seeing what was going on in politics joined the remains of the Tea Party movement and created the MAGA party in 2016 which was composted of Hillarie's "Deplorables".

Trump not being politician, didn't realize the hornets' nest he stepped into by beating Hillary. Prior to 2016, Trump was a very well-liked businessman with no enemies; see his book "Letters to Trump." It is a book full of images of letters from famous people that thanked him for something that Trump did for them. Many of them, after 2016, now think he is public enemy number one and that everyone "always" hated him according those radical progressives.

The Narrative of Trump being a tool of Vladimir Putin, the Russian President, was created by the minions of Hillarie's Campaign with the support of Obamas Department of Justice. This occurred by using The USA Patriot Act that had been signed into law by President George Bush on October 26, 2001 one month after the 9/11 attack on the twin towers. The act was very controversial and primarily a Republican creation. In 2020 the bill expired as the extension was not passed in the House. But the FISA Court system and other provisions like the Department of Homeland Security were maintained. During the Obama's administration, the previously developed FISA Court system was turned into a Weaponization

tool by AG Holder who had turned the FISA court system away from looking at “domestic terrorist” to looking at Obama’s political enemies. In addition to the Democrat and Republican Party’s the deep state, the administrative state, the CIA and all the other intelligence agencies are a part of this stop Trump movement. And that process is still going on after eight years, as Trump still wants to make America Great Again now for the second time!

This book is a summation of several decades of research that started in the 90’s. It is based on my education my work history my reading in several different fields that run from psychology threw Quantum Physics and ending up in religion. And of course my life experience from 1941 to 2024 encompassing the end of WW II, the Korean War Vietnam the cold war the war on terror, and whatever you want to call what we are in now. I pray to God it doesn’t end in WW III. This book is the third one I have written in this arena and I do not think there will be any more.

This book is also a warning about what is coming in the next 8 years, none of which will be good!

A quick summary of our History

From Aristotle and Plato ~3,400 years ago until 1887 after Karl Mark published his *Communist Manifesto and Capital Volume One* there were hundreds, if not thousands, of governments that rose and fell but something was different now as a new political system had been developed and approved on March 4, 1789. Which was of course, the US Constitution that was quickly followed by the first ten amendments called the Bill of Rights. There had been only one serious defect slavery; mostly in the South, (The slave owners were primarily Democrats)

Before continuing, we need a clarification of slavery prior to the Civil war, which was a very common practice back then everywhere. Many of the Africans that were here initially were Indentured Servants not slaves and they were white and black. And further some free Blacks owned black slaves. There wasn't a country in North America, Central America, or South America that didn't have slaves, back then, and this included Indian Tribes

The problem of slavery in America had been solved by the American Civil War from 1861 to 1865. With slavery gone, the potential of the country was unleashed and by end of WW II in 1945 80 years after the Civil War the United States was the dominate power in the world. No other country was even close as most of them had been decimated by World War II.

So what did we do; force the beaten countries to be ruled by us which was the way it was done in most all prior history. No, we created the United Nations and the Marshal plan to rebuild most of the destroyed countries, even those that were our enemy's. Yet today we are told that we are and always have been an evil racist country for all of what we had done in the past.

Twenty four years after the end of World War II Apollo 11 launched from Cape Canaveral on a Saturn V launch Vehicle on July 16 1969. Four days later (I watched this on TV) on July 20 1969, the LM Eagle (Lunar Module) was on the moon with two astronauts Buzz Aldrin and Neil Armstrong the

first man to step on the moon and he said "That's one small step for man, one giant leap for mankind." Michael Collins remained in lunar orbit in the CSM Columbia (Command Service Module, They all returned safely to earth on July 24 1969.

Although much progress was made from 1969 to today, politicians and politics, got involved, and the Space Shuttle program to build a space station in orbit ending up having too many problems (Political reasons). So it was canceled and supporting space launches, were moved to Russia using Russian rockets until just recently.

Elon Musk took us back into space when he created Space X and then quickly got into revolutionary rockets designs for putting things in orbit like Falcon Heavy and Dragon putting things in orbit with reusable boosters. Starlink and starsheld will also improve our technology dominance. BUT Starship is the real deal if we are ever going to return to space.

More recently, what took space travel away was the explosion in tech in the world starting in the 1970's with computers and software. IBM, Micro Soft, Apple, Hewitt Packard, Texas instruments, Xerox, Intel, AMD, Cisco, Adobe, Facebook (Now Meta), Google (now alphabet), Twitter (now X), Just to name a few of the hundreds now out there. And we can't leave out Smart Phones. We will have more on them later.

However although the above companies do have operations in the US much of it is now off shore. In fact, manufacturing in general has moved out of the US mostly, but not limited to China. This was the result of two events. The first was corporate greed, resulting in government trade policies like NAFTA, but the main reason was faulty economic.

McKinsey & Company headquartered in New York City is a strategy & management consulting firm. They, I believe, were the ones that started the process of moving manufacturing out of the country. I believe this started in the late 70's or early 80's. The logic McKinsey consultants used was that there "targeted" company executives would be told that if they moved their

manufacturing to some place like Indonesia or China they could significantly reduce their cost of production. Now I will grant it sounds great, make you product in a low cost country and keep marketing finance and R&D in the US.

In a perfect world some of that might work, however, doing this on mass scale would eliminate a lot of good paying jobs in the US. Way too many companies did this and although their profits would go up, temporarily they would not stay there. General Electric (GE) was probably one of the top manufacturing companies in the world and after this switch to off shore manufacturing they became a small fraction of what they once were. This was one of the reasons I left GE after 8 years.

China, one of the beneficiaries, was very clever and so they demanded that they had over 51% ownership of the new Chinese company brought into their country and they wanted the R& D to be moved to China as well. The companies that did this would find later that they lost a lot of their customers as the old high paying jobs were gone and the consumers were buying less from them. This did in fact happen in the US.

For an example, in the 2005 to 2008 time frame, I was going to start my second manufacturing company in the Cleveland Ohio area. However, when I talked to local politicians for help they told me “why make it in the US make it in Asia.” I was shocked by this and it wasn’t just here in Ohio it was across the entire country. The thought process was we are moving in this country to a service based economy. They thought production was like farming it can be made elseward with automation and cheap labor. That thinking came from looking at US farming from the start 1789 where farming was the major employer in the country until the internal combustion engine was invented. Tractors replaced horses and now a few farmers could feed an entire country.

We were told back then everyone was going to go to college and there would be high paying white collar jobs for all.

Now that change may have worked, back then in the ninetieth century with the farmers; but that was just a shift of jobs within the country; from farming to factories not out of the country. When you Move the jobs out of the country so that no one in the country makes anything, what happens to those workers? We can't all be office workers. How are the blue collar workers going to earn money? And if they don't have those good jobs who are going to be your customers? I wrote on this subject in my Economics thesis, 1964 from a slightly different angle, but the same basic problem.

Now the other part of the problem was government spending, so now we have a new problem to deal with. This problem was an economics one as we were now dealing with different currencies. The goods coming into the country were priced in that company's money and the buyers in this country had dollars to pay for them so a system was needed to convert one to the other. Exchange rates were established to solve that problem. However, the exchange rate was based on a "need" for the currencies in question. If there was no need for country X's currency how could they pay for what they wanted?

China, after looking at what Japan did, mastered this process. For example, a US Company A bought Product produced at company B from Chana and they paid that company B in dollars. Company B took the dollars and gave it to a Chinese Bank run by the government who took the Dollars and gave them the equivalent Chinese Renminbi or Yuan, So the American Company A and Chinese company B are both happy.

The issue is in the Chinese Bank who now has the dollars, what can they do with them? Well its simple they buy US Government Bonds with some of the dollars and buy other things, like politicians, they needed control over with the rest of the dollars. To hold the exchange rate at a value that favored the Chinese most of those Dollars were used to by the US Treasury bonds. At one point, around 10 years ago china has over \$1.25 trillion dollars in US Government bonds.

NOTE: Keep in mind what just happened, in the example above the amount of money in the world just doubled we had X dollars in dollars in the US and x dollars in Yuan in China.

Back to the story transaction story, What this meant was that the US Government was being “funded” in part by China. This allowed the US Government to Broker huge amounts of money to give away into social programs and others (NGO’s) which were needed as more and more people lost their “good’ jobs to China and other countries as well but China was the biggest by far.

Michael Pillsbury wrote a book on China published in 2015 titled *The Hundred Year Marathon* China’s Secret Strategy to Replace America as the Global Super Power. This book is a real eye opener as it describes the process and deception the Chinas leadership used to steel everything we had and turn us into a has been country. The hundred year part of the title was from Mao Zedong and his desire after taking over China in 1949 to then to take over the United States in 100 years which would be 2049.

Obviously, this can’t go on forever. What we are seeing now is the Chinese are no longer buying bonds they are buying companies and property in the US with that money, so their holdings are now less than 800 Billion (about 2/3 of what they had just recently). Japan is now the biggest holder at just over 1 trillion. There are also other countries doing the same thing on a smaller scale. In essence, we are selling the countries assets so we can pay people not to work. Does this make any sense, of course not? But the politicians don’t care as they manage to get their hand on a lot of that money and retire very rich. This was a simplified analysis of this process but it is reasonably accurate.

Question what happens when Japan and the other countries wise up to what China is now doing and no one will buy US bonds? They have enough bonds that they could buy a big chunk of our country. But worse we are headed for a Water Fall Event which is when no one will buy your bonds and that is the end of that country.

The next step in understanding what is happening in our countries is to look at the World Economic Forum (WEF) which was formed by Klaus Schwab in 1971 in Cologny Canton of Geneva, Switzerland. Schwab was an engineer so he fits well into the technocracy movement that believes that technical people like engineers should be the ones that control the entire world. They are the only ones that can “optimize” everything. However, should everything really be optimized? Read *Technocracy Rising* by Patrick M. Wood published in 2015 for the details

Schwab started a program to train what he called the Young Global Leader when he started the WEF in 1971. And he trains a new batch every year and now 53 years later most of the world’s leaders are graduates of his program. Barack Obama and Justin Trudeau are two examples of what you get. Schwab holds a conference every year at Davos Switzerland. Everyone that is someone goes to this major world event. The last one as of the date of this paper was on January 19, 2024.

To promote his vision Schwab produced two books the first was *The Fourth Industrial Revolution* by Klaus Schwab published in 2016 and the second was COVID-19 *The Great Reset* by Klaus Schwab & Thierry Malleret published in 2020.

In his first book *The Fourth Industrial Revolution* Schwab, discuss a future Utopia where technology has advanced to the point that we can transfer our consciousness to a computer with advanced CPUs and tons of memory and thereby live for forever. He calls this process transhumanism. The drive for artificial Intelligence (AI) software is driven, in part, for being able to do what Schwab wants, or so they think.

In his second book COVID-19 *The Great Reset* Schwab, discuss the opportunity that the COVID Pandemic gives him. As the shutting down of Western, civilization for over a year destroyed society and put the fear of death in all the people. The way this was done, timing, it shows advanced planning as it would have been impossible to write and produce a book like this and have it published in 2020 when the pandemic had just started and

no one knew in the summer of 2020 what was going to happen with the CoVID-19 and the “vaccine” that was still in development. No one isn’t exactly correct as the people that made the virus knew exactly what there were doing. The prove of knowledge was the stock they were buying prior to COVID.

In Chapter 11 of Robert F. Kennedy Jr. book *The Real Anthony Fauci Bill gates Big Pharma and the global war on Democracy and Public Health* RFK shows the conspiracy being promoted by Bill Gates, Anthony Fauci, and Klaus Schwab. Each of these evil men have twisted minds and a thrust for power and money, which they acted on with the mRNA gene therapy that they promoted with no qualms about the large number of people that they will end up killing. By large I mean multiple billions as their goal is only to have about 500 to 600 million people on the plant but they might settle for one billion left alive. Contemplate that! They, make Joseph Stalin, Adolf Hitler and Mao Zedong look like mere kindergarteners.

Gates actually wants to reduce the world’s population by at minimum 90% because of Climate Change (more on this later), Fauci doesn’t care how many people he kills with fake drugs so long as he gets a lot of money, Pfizer, knowing how bad the mRNA “vaccine “was/ is selling it anyway they should be put out of business and the executives put in jail for life. Schwab wants to rule the world at any cost and be up loaded into a computer. There are also many others involved like George Soros and Justin Trudeau and many others of the rulers in all the Western Civilization countries. These are the real enemies of the United States and the world.

To have a society or group of people there has to be something in common i.e. if you are in a club that likes to play cards then Card games hold the group together. If you live in a country, you have a language in common and many other factors. So you can’t have a club to play cards where no one likes to play cards and you can’t have a country if you all speak different languages. This subject was analyzed by Montesquieu in his book *The Spirit of the Laws* published in 1748 in Paris. There are no excuses for

doing stupid things today when we have known better for hundreds years, like dividing the country into multiple groups by race, language, sex, religion and education. Divide and conquer is the old saying as if you have nothing in common with others why would you help them?

Over two thousand five hundred years ago, the Greeks worked out the forms of government and that they change from one to the other in a pattern. The Romans also saw the different patterns and identified it as ~80 years cycle comprised of 4 generations of ~20 years each generation, that they called the Saeculum. After the collapse of the Roman Empire, it took a thousand years to reestablish the Saeculum cycle which does require an established country.

In 1997, William Strauss and Neil Howe published a Book *The Fourth Turning* which explains in detail the Saeculum we are now in. When they wrote the book we were in the 3rd of 4 generations, and the authors explained what would probably happen in the 4th turning, based on documented common history going back hundreds of year. We are now experiencing one of their predictions.

The Saeculum cycle is First male domination, the Second is transition from male to female, the third is female domination, and the forth is back to male domination. Neither the male nor the female domination is good by themselves. A blend of sorts is needed to make things more stable. They traced the cycle back to the War of Roses in England from 1435 to 1487. We are in the 4th turning right now and every 4th turning ends up in a mayor defining war (that changes everything) which starts the next cycle when it ends.

The previous cycle was the American Civil War to WW II. The cycle before that was the American Revolution to the Civil war. The lengths of the cycles are not hard they vary; it's only the averages that are ~20 years and ~80 years. There is also one other thing to consider and that is no republic ever lasted more that than three 80 year Speculums and 1787 (Year the US

Construction went into effect) plus 240 (3 X 80) years equals 240 years or 3 years from now 2027 could this be the start of WW III.

These numbers and dates are more or less in line with Martin Armstrong and his Economics Confidence model (ECM). The ECM will be more accurate since it is based on the movements of money rather than personal opinions based on the writings of the people living during each of those periods. The differences are mainly in the starting and ending events as we move through time. The material in the book *The Fourth Turning* is easier to understand than some of Martin's charts and graphs. However, keep in mind, his are more accurate.

Reasonable web searches will give you most of what you saw in the History but they will not explain how or why this 176 year (16 generations) process was started or why it started. What I am going to try now is to give you the basic plan that was conceived and what those that started it wanted the end result to be.

What our elected leaders are doing have been done in the past and the best documented example comes from the USSR under the rule of Stalin from April 3, 1922 to October 16, 1952. And as described in detail by Aleksandr I. Solzhenitsyn in three books released to the world in the 1970s were *The Gulag Archipelago* Volume One, Two & Three. The average length of the books is over 650 pages including references in the back. I have read all three books and they were very hard to read as what was described was barbaric.

We will probably never know the number of men, women and children who were killed from 1934 to 1953 but Wikipedia has it at 1,053,829 people which is probably a very low number as record keeping was not all that accurate and there were no records from 1922 to 1934.

Keep in mind when you read the book that the people that are running the WEF social changes now are probably more evil than Stalin. And they are

working with over 6 billion people not somewhere around 190 million people in the USSR in the period from 1940 to 1955.

If Schwab Gates and Fauci kill, the same proportion as Stalin did that would be ~1.52 billion. They are looking to eliminate a lot more than that from the planet.

How does all this fit together?

Now, we get to the key points that are changing everything. Then we look at how everything fits together. The founders knew after winning the war of independence from England that the Articles of Confederation ratified in 1781 were not working and so they meet in Philadelphia to make changes to the articles of Confederation in the summer of 1787. There were 55 delegates to the Constitutional Convention. The book *Founding Partisans Hamilton, Madison, Jefferson, and Adams Brawling Birth of American Politics*, goes into detail on the process that starts what they hope will work in the new country. I recommend you read that book as it gives you the understanding of all the changes that were made after it was ratified in June 1788 and then on March 4, 1789, they had the first meeting of the new Congress.

One of their first duties after setting up their congressional operating rules was creating what would be The Bill of Rights added and adopted on December 15, 1789. The Bill of Rights was the compromise between the Federalists (large federal government) and the Anti-Federalists (small federal government). Slavery was also a problem and an attempt was made to limit it which didn't work. But what most people forget is that Slavery was very common in the world and had been for centuries. Critical Race Theory (CRT) and the current misinformation also created have re-written history to make it seem that only America had slaves.

Also, the founders did know that Republics don't last long and they tried very hard to make America an exception to the rule. If it hadn't been for Karl Marx, it might have worked.

The battle between big government and small government was now in play and was soon to get help from two people the first was from Charles Robert Darwin, born in 1809 and died in 1882, who would write a book based on his travels *The Voyage of the Beagle* which was about his trip and published in 1839 and then a second book *On The Origin of the Species* published in

1859. In the 2nd book Darwin writes about finding fossils in layers of rock and develops a theory that random changes in what ever made us could explain our existence. He based this on seeing changes over time in the bones of ancient animals and also in plants. However, during the Cambrian period starting roughly 538 million years ago and lasting 13 to 25 million years there was an explosion of forms of life. So even Darwin had doubts about random changes accounting for these changes so quickly. Ever since then those that buy this idea of Darwin are still looking for that prove.

The second was Karl Marx who was born in The Kingdom of Prussia on May 5, 1818. And after attending several colleges, Marx received a Doctorate of Philosophy in 1841 and moved to Paris. Marx was initially a fan of Georg Wilhelm Hegel and his dialectical change in history theory. Marx wrote about Hegel theories between 1846 and 1858. But Marx was not satisfied with Hegel's work and started to develop his own theories of a slightly different Dialectic. While in Paris, he would meet Friedrich Engels and they would become lifelong friends. Marx and Engels moved to Brussels in 1845 and joined the communist League consolidating his opinions with theirs and in 1848, he wrote The Communist Manifesto, which expresses Marx's ideas and lays out a Programme for revolution. That work got them in trouble and they were expelled from Belgium and Germany in 1849. Fortunately, for them Engels was from a wealthy family that owned factories in England and they both moved to London.

While there, Marx continued his work on developing his theories writing several books and papers including Das Kapital in 1864 which summarized his theories. He also helped found the International Workingmen's Association. Lastly, he wrote most of two other follow on books that Engels would publish after Marx died on March 4, 1883 Das Kapital II published in 1885 and Das Kapital III published in 1894. I have read all three books.

Marx's theories were about the ruling class who owned the means of production who he call the Bourgeoisie and the working class forced to work for less than their labor was worth who he called the Proletariat. Marx

believed that if the rich “Bourgeoisie” could be eliminated and the workers “Proletariat” could then receive the full value of their work. But there was a flaw in his thinking as labor itself could not make anything without tools, equipment and a building referred to as Capital in economics was also needed and there was a cost of capital as well. I am simplifying this as it’s a bit more than just that.

During this period, working conditions were not good in Europe since the Proletariat were still serfs, so to speak, and they did not own the land. So this movement took hold in Europe and the leaders there who were mostly royalty got very worried that they were going to be eliminated.

However, in America, private property was allowed and many of the working class “Proletariat” owned their land and since Marx’s work coincided with the American civil war he never really got to see what a free people could accomplish. His theories only made some sense in Europe. However, since a free people were not serfs’ his theories were wrong anyway.

And they were wrong on multiple levels the first being described in the previous paragraph. The second and worse problem was that Marx never explained who would make up the government and what form that Marxist government would take. That critical error nullified his theories completely. However, Marx put the fear of God in the European monarchies and they began to take counter measures to insure they survived if Marxist, theories began to take hold.

Now looking at America after the civil war our elected leaders were also worried about that what was happening in Europe and would that happen here. Now during this time from the end of the 19th century into the beginning of the 20th century there was a revolution of technology happening in America and Europe. And the federalists now calling themselves the Democrats saw openings developing. Darwin showed them they don’t need a GOD and so they would adopt Marxist teachings since that also didn’t need a GOD and that allowed them to eventually get rid of God. God was a mortal threat to the Marxists aka Democrats.

The start of the Eugenics movement in the US was between the 1920s to 1930s and was based on Darwin theory of survival of the fittest and that there was no God needed. Eugenics is culling the population so only certain ones are allowed to live.

President Woodrow Wilson in office from 1913 to 1921 would help them with their goals. Marx's theory called for a new form of government that owned everything in the name of the people. And Marx never gave any principles on how that would work. They decided to call themselves Progressives instead of Marxist to hide their true intentions.

Three things happened in 1913 the Federal Reserve System was created. Then we had the 16th Amendment to the Constitutional allow a head tax (income tax) which was a major change. The founding founders new that a head tax (income tax) would start small but grow exponentially giving the federal government way too much power. And lastly, there was the 17th Amendment to the Constitutional for the direct election of Senators. This was another major change as it took power away from the states. These three things were instrumental in turning the country toward a tyranny.

Next we had Margaret H. Sanger opened first birth control clinic in 1916 which became Planned Parenthood in 1921, Then we had The Great War (WW I) 1914 to 1918 and toward the end of WW1 the communists took over Russia in 1917 and later killed the Czar and all his family and created a Marxist state by 1927. Also in 1918 as the war ended, we had the great influenza outbreak which was the deadliest pandemic in History, including what we had in 2020. We learned from that pandemic what didn't work which were masks and lockdowns. They tried both and they had no effect of slowing down the transmission. Fauci and Birx both knew that and mislead President Trump. Scot W. Atlas, MD explains in detail what was going on in the White house in his book *A Plague Upon Our House* published in 2021. This was from someone that was in the White house and qualified medically to discuss this issue.

The 19th Amendment to Constitutional women's right to vote was ratified in 1920 and we entered the roaring twenties. This was a period of rapid growth and prosperity. There was new music, women's fashion "flappers"

automobiles, radio, movies, phonographs, phones and prohibition and speakeasy's, it was a wild ride up to 1929

The scopes Monkey Trial in July 1925 was held in Dayton Tennessee. This was a famous trial about teaching in public schools Darwin's theory of survival of the fittest over God creating us. It was a show trial to show that evolution proved there was no God needed.

Science & engineering (Scientism) plus Marxism (Progressivism) takes off in the late 1890's through the 1920's merging the two different systems into one called Technocracy. Technocracy is a political system that believes that only engineers should run a country, not attorneys, as the engineers know how to optimize things. This gives Marxism the missing link, the way for the Proletariat to govern, In essence optimize everything: food production, energy production, transportation, manufacturing etc. etc. once everything was optimizes then you had the perfect society, Utopia.

The basics were developed in the 1920's and 30's in Columbia University in NYC by Howard Scott (marketing) and Walter Rautenstrauch (engineer) who used the 1929 market crash and economics collapse to promote their theories; since the economic collapse "proved" capitalism was dead. Actually, it proved the federal Government did know what they were doing,

The economic contagion that began around September 1929 and led to the Wall Street stock market crash of October 24 1929 which started the Great Depression which lasted until 1939, which leads us to the great Depression.

The Great Depression was actually the fault of the newly created Federal Reserve Bank (FED) since the Board was inexperienced and just didn't know what to do and the man that did Benjamin Strong Jr. had died unexpectedly on October 16, 1928 twelve months before the crash. The FED Board by misunderstanding what was going on allowed three waves of bank failures to happen 1930, 1931 and 1933. Over nine thousand banks closed which was about 30% of the number of banks in the country leaving the country in horrible shape and setting the stage for a new American President.

Milton Friedman & Anna Jacobson Schwartz Produced the best account of the Great Depression titled *A Monetary History of the United States. 1867 – 1960* published in 1963. I highly recommend this book if you have at least a basic understanding of economics.

Franklin D, Roosevelt became President on March 4, 1933 and created a series of programs called the “new deal” which was a series of programs and projects instituted during the Great Depression. President Roosevelt (FDR) aimed to restore prosperity to Americans. When Roosevelt took office, he acted swiftly to stabilize the economy and provide jobs and relief to those who were suffering.

Over the next eight years, the government instituted a series of experimental New Deal projects and programs, such as the CCC, the WPA, the TVA, the SEC, and Social Security. Roosevelt’s New Deal fundamentally and permanently changed the U.S. federal government by significantly expanding its size and scope, especially its role in the economy. FDR’s policies during his four terms in office made changes significantly increased the power of the federal Government thereby making the citizens more dependent on the federal government. This was the start of socialism, which is nothing more than Marxism light,

Although FDR’s programs did help some it was the start of WW II that brought us out of the depression as we build and started to ship in 1939 material for the war in Europe started by Germany.

WW II destroyed most of the civilized world leaving only the U.S. with a function economy. The U.S. then started the Marshall plan and we rebuild the world. However as soon as the war was over the USSR (Russia) decided they would follow Marx’s plan and take over the world. They started with China, and went on from there. Then since Russia now also had atom Bombs, we ended up with Mutually Assured Destruction or MAD creating a stalemate. Politicians were more rational back then.

The CIA was formed and conducted a hidden war against Marxism in 1947. Their focus on Marxism was so intense that they were blinded to reality. The assassination of President Kennedy was not the first evil thing they did. A good summary can be found in David Talbot's book *The devils Chessboard Allen Dulles, The CIA, And the Rise of American's Secret Government*. During those years the CIA did a lot of things that were self-serving and resulted in eventually creating the deep state and the forth branch of government after 9/11/01.

The end of WW II started a new chapter in America, first with the next generation the Boomer generation that was born starting in 1943 and running to 1964. And they would change everything.

Everson v. Board of Education Supreme Court rules "public" money could not be used to Bus kids to religious schools 1947. And this began the war against religion.

The Chinese Communist Revolution started in 1921 and culminated in the establishment of the People's Republic of China in 1949. For the preceding century, China had faced escalating social, economic, and political problems because of the decline of the Qing dynasty and Western and Japanese imperialism.

The Korean War began on June 25, 1950 when Communist North Korea invaded South Korea and it ended with an armistice on 27 July 1953. China and the Soviet Union supported North Korea while the United States and the United Nations supposed South Korea.

A hundred and fourteen years after Darwin's book James Watson and Francis Crick in 1953 discovered the Nucleic acid double Helix, which shows the blueprint for creating a human being. Then 34 years later in 1987, Fred Hoyle published *Mathematics of Evolution* proving, using mathematics, that random events cannot explain evolution.

The Vietnam War was first a conflict in French Indo China that the French lost at Dien Bien Phu in 1954. The country was then divided North and South. The next year the Northern Communist Vietnam invaded South Vietnam Laos and Cambodia on November 1, 1955 which continued on to the fall of Saigon on April 30 1975. It was the second of the Indochina Wars and was a major conflict of the Cold War where 58,281 military personnel were killed in action (KIA) and 47,434 were wounded and I was one of them.

Fidel Castro overthrows Fulgencio Batista on January 1, 1959 and Cuba becomes a Communist country. Two years later on April 15, 1961 the CIA sponsored military invasion started on the Southwestern cost of Cuba by 1,500 members of Cuban exiles who opposed Fidel Castro. By April 19, 1961, the invaders were all captured or killed. It was a big embarrassment to the United States. This fiasco let to the Cuban Missile Cress of October 1962 that almost ended in a nuclear war with Russia. What is important about this is what happened to the CIA after creating the Bay of Pigs disaster.

The first thing was the assigation of President John F. Kennedy in Dallas Texas on November 22, 1963 at 12:30 pm CST. According to the book, *The devils Chessboard* written by David Talbot the CIA was involved in the assigation and other like things. It was a very interesting read. Later when I was stationed at Ft Campbell Kentucky as a Captain and the Deputy Post G2, Martin Luther King Jr. was assimilated on April 5, 1968 and I was in the link for Intel I got a much better understanding of what our intelligence agencies could do. However, I didn't understand the ramifications of the Intel reports I was getting from the pentagon. Decades later looking back at this period there were a lot of assignations so, were they all connected to the CIA? That questioning helped me to write this book.

With President Johnson now in office things went to hell in a hand basket. First, we had the Vietnam War then the Bomber generation protesting and rioting about the war, and then progressives Democrats and Johnson saw

an opportunity to pass the Great Society programs that they had been working on since FDR. These programs sounded good at the time but they would end up making major changes to the country that were not good.

Civil Rights Act of 1964:

Voting Rights Act of 1965, Civil Rights Act of 1968.

Creation of the Department of Housing and Urban Development 1967

Immigration and Nationality Act of 1965:

Federal Funding for Education

Higher Education Act of 1965:

Elementary and Secondary Education Act 1965

Public Broadcasting Act National Endowment Act 1965

National Endowment for the Arts

War on poverty:

Revenue Act 1964 Economics Opportunity Act 1965

Head Start, Food Stamps, Work study, Social Security Amendments of 1965, new programs of Medicare and Medicaid.

Creation of the Department of Transportation 1965

Apollo program:

Funding for the Apollo Program and Kennedy Launch Center

With a few exceptions, almost all of these programs and acts would result in handouts which is what socialism is. Worse, many of the ways to get money was that if you were a woman with one or more kids and no husband you got a lot of money from the government. So what happened well, of course, a man and a woman would have kids but the man didn't live with the woman? So this program eventually destroyed the family of the poor people both black and white. This program by itself destroyed the inner cities of all the big cities. I know this as I saw it happening.

Those that planned the conversion of the country were Progressives (1886-1908), Technocrats, (1929-1946) and Bombers (1964 -1984) each group looking to the teachings of Karl Marx and communism to fix things by

personally gaining wealth and power. They were all very educated and thought the world would be better if they ran everything which was Hubris on steroids for politicians.

Key social changes were Public education by end of 19th century, Creation of multiple departments and agencies (administrative state) out of control after 9/11/01, The Eugenics Movement to cull the herd by 1930, Use of the term Progressive by Democrats 1920's, Creation of the Technocratic movement. 1930's to control the government. FDR's Great Society 1930s was the start of the conversion to Maxims. First remove religion from society in 60's, formation of the world economic Form in 1972, Critical Race Theory, Transgenderism, open borders, mail in ballots and the Coup d' etat was smart phones and 5G

There are three key constitutional and questionable amendments: The 16th Amendment (tax the people) the 17th Amendment (elect the Senators), The 26th Amendment 18 years old, and you can vote. We will discuss them in the next section in more detail.

I will end the section with four books written between 1932 and 1958. These four books are fiction but reflect, accurately, what the authors saw what the impact of Marxism and Technocracy would be if it were be adopted in the any of the worlds countries. They were very smart men. These stories were based on either Marxism or Technocracy.

1932, Brave New World by Aldous Huxley

1945, Animal Farm by George Orwell

149, 1984 by George Orwell

1958, Brave New World Revisited by Aldous Huxley

Discussion on where we are today

The following listing contains the main items that the powers to be (Democrats and Republicans) are using on us to get and hold power over us that they have no right too. These sixteen are not in any particular order.

Issue One Religion A

Without God or religion, we have no morals we can do anything we want to do; with the only goal being not getting caught if, it wasn't legal otherwise it doesn't matter.

Issue two Religion B

Without God, the people have no rights and they are "only" there for the benefit of the rich and powerful, in other words serfs or slaves.

Issue Three Religion C

Supposed proof that there is no God comes from three sources. First from Karl Marx (Marxism) in 1848, next we have Charles Darwin in 1859 (evolution) and lastly we have Father Georges Lemaitre in 1927 (The Big Bang).

Issue Four Religion D

The Scopes Trial in Tennessee in 1925 was the first government attempt to separate Church and State. Later we started to remove anything religious from public places.

Issue Five Administrative State is not allowed

The creation of the administrative state in the 20th Century that can make laws and fines without the approval of congress, So the people have no real say and the republic is gone, like with what is going on today with changes being made to education by the US Department of Education telling children in elementary school that they can be a girl or a boy when they grow up. But don't tell your parents they don't understand. And if the parents do find out and complain the FBI shows up at their home and interviews them for complaining.

Issue Six Finding a way around the 10th Amendment

The federal government took control of the education system and for all practical purposes removed state and local control from the states, which is a violation of the 10th Amendment.

Issue Seven Fiat Currency

The creation of “fiat currency” (removal of Gold and Silver as money which was not allowed by article 1 Section 8 which describes coinage (Money) which was Gold and silver. And no head Tax was allowed. This was changed by the 16th Amendment.

Issue Nine Not following the Bill of Rights

In the Bill of Rights Amendments #1, #4, #5, #6, #7, #8 and #10 are routinely violated by the current federal government. The UniParty is clearly not supporting the Constitution and the Bill of Rights.

Issue Ten LGBTQIA+

With the formal creation of the LGBTQIA+ relationships in the 1960's and allowing same sex marriage; the government started the destruction of the social order. There was an alternative for the Rainbow community a simple modification of “Common Law” which could have made the union legally valid (the same as a church marriage).

Issue Eleven Transgender

However, the current Transgender push in the grade schools telling girls and boys they can actually change their sex is criminal. And any medical person that supports this has violated the Hyparchic oath and should be criminally prosecuted and executed. This is clearly a violation to the Nurnberg Code documented after the end of WW II.

Issue Twelve No Transgender in Schools

Any one that supports the transgender narrative in the school system should be immediately fired.

Issue Thirteen Voting

The voting system has now been compromised on several levels by the Democrats without the objection of the republicans. Watch the movie “Let My People Go, which is a story about 2020 and J6 that is very well done.

The US Constitution gives the state assemblies the primary power to control the federal elections in Article 1 Section 4. And federal elections are

required every two years. Up until the end of the 20th century, we had election days and we knew the results the next day or two. Today we have election months and it might take another month to count the ballots. Obviously, something is not right! With the technology, we have and I know computers we should be able to know the results the minute the poles close. However, because there are six time zones for the states and three more for the territories that gives us a total of nine. So because of the instant access of news no election should be called until they are all in say the next day.

What we need is a sound and secure voting system like the following: A national holiday where everyone can vote as the polls would be open for 24 hours. Ballots would be paper and no mail in ballots would be allowed, Deployed military would vote where they are and tabulated where they are if practical. No voting machines would be connected to the internet in any way. Further, all polling places would have security cameras in all areas which record everything. A representative of every party on the ballot must be there to have a valid count and sign off.

Issue Fourteen 14 Climate Change

This one is very complicated because it is related to the myth of Dangerous CO₂ being a danger to all humanity. I studied Geography and Climate in college in 1964 and global warming was nowhere in the study curriculum. Per the books back then climate was always changing. My research starting in the early 00's and it didn't take long to see that something was seriously wrong with the Climate Change agenda. Agenda 21 agenda now agenda 30 and agenda 2050 are all based on the planet overheating and causing billions to die is just propaganda. It's so easy to disprove that the narrative is false that it is really hard to believe that people believe what they are being told. But they do so it must really be easy to get people to believe things as long as it comes from the government. Just for the record, we are in the middle of an ice age with more risk of freezing than boiling. However, since this myth is being used to intentionally to destroy society it is an important element, unfortunately the proof requires a lot of math and logic so that is a subject beyond this paper.

The book *Confessions of A Greenpeace Dropout* written by Patrick Moore and published in 2013 will explain it but not as good as one of his U tub videos that makes a compelling case against the IPCC narrative. The

following link is to my knowledge, the best presentation on Climate change ever produced. The presentation is given by Dr. Patrick Moore. At the Economic Education Association of Alberta Conference, November 15, 2016 <https://www.youtube.com/watch?v=GXBBNcAvCsU>

Issue Fifteen COVID & mRNA gene therapy

Is the mRNA gene therapy (Vaccine?) and the SARS-COVID-19 virus? The Covid-19 pandemic was the brainchild of Bill Gates and Anthony Fauci with the help of Klaus Schwab. The mRNA development goes back a long way and leads directly to Bill Gates and his plan to reduce the world's population from 8 billion to less than 1 billion if possible. The plan that was developed was based on reducing food and energy to the level that would only support one Billion more or less. This kind of reduction would be on two fronts multiple pandemics and a mayor war (WW III). One of the drug company's Pfizer had been working on a new type of vaccine mRNA gene therapy. Unfortunately, they had never been able to make it work on animals. Fauci now gets into the picture and getting with his buddies to modify a CORONA virus to get it to recognize and latch into a human cell they call this "Gain of Function" i.e. make it more lethal so we can study it.

Steven Kink wrote a fictional book about this a pandemic that was man released in 1978 called the Stand. Later it was made in to a movie in 1994. Maybe Fauci got his ideas from this move,

After creating what was to be COVID-19 they moved it to China in the Wuhan lab since they knew it would leak out as the lab had poor protocols and sure enough, that is what happened. From there it spread across the entire world killing millions, because the mRNA "vaccine" didn't really protect anyone and more people died because of it and that will continue as it has created major changes in a human body including reproductive problems in women and heart problems in men. Further there are brain function disorders in both men and women. It will be many generation before we find out how bad it was.

The problem was made worse by the methods used to stop the spread as mask mandates and shutting down the economy destroying many businesses and caused all kinds of mental problems in parents and kids that they will never recover from. Besides killing as many people as they could they also put the fear in the people that this happened because not everyone complied with the directors of the FDA and CDC and of course,

Dr. Fauci and Dr. Debora Birx were instrumental in what happened in 2020 and 2021. And now that the people are conditioned to masks and lock downs we can expect more this fall.

Issue Sixteen Lawfare

Lawfare is a method of going after a political enemy by cleverly combing legal items and or just making them up so you can charge the Target person or persons with a crime that does not actually exist. There are a lot of attorneys that know how to do this. The prosecutor is trying to convict a person for a crime that does not exist; and it is very common at the Federal level. All the “crimes” that they have charged President Trump with fall into this category.

Serious Problems that can/will arise from the previous section

Serious future problems One

Today social media is monitored by Artificial Intelligence (AI) to look for key words that could be anything. And “everything” you do with your phone is recorded forever. Within the various agencies that have use of the FISA system they are not allowed to share data outside their assigned responsibility, this is called a Silo system. The silo system is used to compartmentalize data with the Director of national intelligence DNC the only one that can see everything. The justification for a search is way too loose to be meaningful. No one is safe from this surveillance system.

Serious future problems Two

Religion has now been neutered. This process has been in play since Marx and Darwin that claimed directly or indirectly that there was no God. President Johnson expanded on this by making it illegal for Churches to get involved with politics and if they did, they would lose their tax exemption. This would not have been possible we didn't have a head tax.

Serious future problems Three

The creation of the Department of education in 1979 was a major plus for the Progressives Democrats. Since the 16th Amendment had approved a head Tax (Income tax) and President Kennedy's Executive order 10988 on January 17, 1962 allowed the federal employs to form Unions. This combination of three items allowed the Federal Government to nullify the 10th Amendment; which didn't allow the Federal government to get involved with local and state issues. How they did this was clever I will say that. I will use the Department of Education for an example. The Department of Education publishes rules for what to teach and for other school functions. However, the states and local school boards are under no obligation to follow them. But they do anyway, why? The reason is that if they don't the Federal Government would stop sending the state money to be used to pay for what they are asking the school boards to do. The alternative to obeying the Federal rules would be to tax the local people more to pay for things. This method is referred to as the Administrative State and it is a well-known

historic problem. That was mostly fixed in England reducing the Kings power in the 1700's, if I remember correctly.

The federal government has created a lot of departments and agencies and every one of them does the same thing. Making this worse since the federal Government allowed unions to represent the government employs and so over time the federal union's moved into the state and local school boards and teachers. My wife who was a teacher said that she thought the unionization of teachers started in the 60's. The Federal government makes sure that the unions are protected. And the head of those unions gives the politicians some of their dues money in return. It's a bad situation as the teachers now do what the federal government wants not what the parents' want or the teachers walk out.

Serious future problems Four

The NSA National Security Agency, is also known has No Such Agency, was formed in 1947 in the same time frame as the CIA, and was known initially for monitoring the radio spectrum. That grew over the years to phones and cell phones and lastly the internet; in essence everything electronic. The collection system is called Prism and the information is stored in massive data storage farms as can be found in the Utah Data Center. The Patriot Act setup the data collection system and the method to use it, in the Foreign Intelligence Surveillance Act (FISA) system.

The Patriot Act created FISA Court and the Department of Justice National Security Division (DOJ-NSD) that uses FISA 701 & 702 Searches to search the data in the various Dada Centers. These searches can be for phones or locations and it allows for going after citizens with proper cause. However, it's very easy for the NSD to make fake material and then have authorization to use the FISA system bypassing the 14th and 5th amendments. This system has been weaponized so it can be used against anyone, even Donald J. Trump in 2016 as when he ran for office the first time The Russia Scam that is still out there was created with 100% false information. The upper level of the FBI absolutely knew what the staff was doing but didn't care.

The FBI can only work in the US and the CIA can only work outside the US, in theory. So what they did was move things around so the FBI did the domestic part of an investigation and the CIA did the other part, when

needed, The Patriot Act was not extended in 2020 so it is gone but the FISA system is still there.

Serious future problems Five

First colleges and now local public schools are nothing more than propaganda organizations. They were taken over in the 70's and very few non-Marxists or woke professors are now on staff. Wokeism is part of this evil change. If you want to educate your kids, it has to be home school or private school but even they will be outlawed within a few years unless we can stop this trend becoming a tyranny.

What they are teaching today in all the school systems and not in any order: Transgenderism meaning that when you are born you are neither a boy nor a girl you determine that later in life when you are in school. Critical Racy Theory (CRT) White people are evil and colored people are good. The US Constitution is racist and much be replaced. Everyone is bone the same and anyone can do anything. The rainbow flag and Equal outcomes for everyone are the goal; which is impossible to achieve.

Serious future problems Six

Smart Phone and 5G have been created to collect data on those that use those phones. Without 5G the bandwidth can't handle the traffic. When they first came out I had one and found out they were very additive so I got rid of it. I did get one again maybe 6 years ago but I do not use it for anything but a phone. No apps other than GPS. I do not use it for paying bills. That is what my credit card is for: and I pay it off each month.

Smart Phones today should be banned from anyone under 16 years old, especially girls. These devices damage the learning of social skills of those kids and is just not worth the access to the web at that age. That damage will scare then for life and is it significant. It's the same reason you cannot drive a car when you are 10 years old.

Kids their age do not understand that "Everything" they put on their phone is permanently stored on large data Storage farms that are all over the world now. And they will be there forever. Worse yet all the apps are designed to get you to do everything on line so the social media companies like Goggle and Face Book and tick tock will know more about you than you know about yourself. You have no privacy you are being watched every second of the

day by someone. You may think it is cool now but when you are an adult what you did when you were Twelve might keep you from a good job.

Serious future problems Seven

The pandemics that have been and still are being created by the US Government are to reduce the world's population by use of the mRNA technology. This mRNA technology is not a vaccine in the old scene or meaning. The CDC had to change the official definition to be able to call it a vaccine. Also, since this was a novel Gene Therapy it could not be mandated or used if there were existing treatments like Hydroxychloroquine or Ivermectin. Fauci had the use of both of them intentional banded. That was a criminal act as hundreds of thousands' of people died because of that ruling. Bill Gates and Anthony Fauci and Pfizer have all made a lot of money off of this scam. And we know that it is a scam as the drug companies would not sell it until they got immunity from the government for any damages it will cause. Unfortunately, since a high number of the US, citizens are sold on the mRNA vaccine a large number will continue to take the jab. However many parts of the rest of the world have figured it out and will not take any more. What the outcome of this will be is hard to predict.

Serious Future problems Eight

Climate Change is a totally made up problem that has been in play since President George W. Bush signed off on agenda 21 in Rio de Janeiro, Brazil in 1992. Then it was funded in the US by President Bill Clinton the next year. This supposed problem is based on the thought that Carbon Dioxide, CO₂, is causing the planet to get so hot that all the ice will melt in Greenland and in Antarctica and that will raise the sea level so much, that it will cause mass migration and the loss of much farm land.

The current narrative (it seems to change a lot) is that if the temperature goes up 2 Degrees C from the base of 14 degree C that we will reach a runaway situation that can't be stopped. In the almost 30 years, this narrative has been pushed for a while now but nothing much has actually happened and we have gone up 1.8 degrees C already with only .2 degrees C to go. Little to none of what they claim is real. And even if the level of CO₂ doubled from the current ~ 4020 ppm to 840 ppm nothing bad will happen,

the maximum effect from CO₂ has already been reached. See the papers published on this web site below, I know one of the authors personally.

website <https://co2coalition.org/publications/>

The real reason for the climate change narrative is the justification to reduce energy and food production down to the level that will only support 1 billion people and get rid of the rest; and that allows Klaus Schwab his dream to rule the world after America Russia and China have destroy themselves.

The apparent plan concocted by the three evil ones Klaus Gates and Fauci to create their utopia is to move everyone left alive in to large cities that will be set up as 15 minute cites; but what kind of name is that? The definition of a 15 minute city is that you can get everting you need within a 15 minute walk from where you live. But bikes also count for the 15 minute rule. And that includes where you work. Actually since you will be happy and own nothing, you will also not need much. Homes if they exist will be the size of a two car garage and most people will be in large apartment building. All energy will come from wind and solar There will be “no” privately owned property and you will be allowed to own a car. Lastly, everything will be on your Phone digital money, digital Identification, passport, and your vaccine record. You will have a social credit score that will determine how far you can go in your 15 minute distance allowance.

Serious future problems Nine

The American voting system has been manipulated into a system that the politicians now have a tight control over the voting system. Some of the changes go back decades but the majority of them related to the tech world and the web. This gives the politicians the ability to make up votes and change votes. Creating mail in voting and extended days to count votes gives then the time to get the votes that they want. This link will get you to a movie that will explain in detail what happened in 2020. You can watch for free or give a small donation. I is worth watching.

https://frankspeech.com/LetMyPeopleGo?utm_source=frankads&utm_campaign=Impgf_728_90

They can also find ways to prevent their enemies' from getting in to office by using Lawfare. Lawfare is a criminally way to make up laws that sound like real laws but are not. Once you have the made-up or Fake law then you shop around to find a prosecutor and Judge that will allow it. Even if you can't get a conviction, you will be able to get the innocent party to plead equity to some lesser crime that is real. This is a very common practice, especially in the federal justice system. Why would anyone plead equity to something they didn't do? Well it's very easy since the prosecutors are working with public money and at the federal level they have unlimited money to play with.

Serious future problems Ten

Just prior to the US Civil War the various political factions split up and then coalesced and became the Republican Party (the North) and the Democrat party (the South) this war was also about federalism and anti-federalism and slavery and no slavery. If today's Democrats (along with the RINOs) can steal the 2024 election from Trump and his MAGA supporters .again, and take control of the Presidency along with the Senate and the House in 2025, the country will be a tyranny within a few years.

How do we make a society that actually works for everyone?

There are, five basic categories' that need to have "similar principles" within them to have a viable social order and a functioning Country. These categories "must" be compatible with each other. If any are missing it will not work. The founders did a great job but over time, evil men have found holes or created them in the system the founders created and we are now stuck with a polarity of evil men and women in positions of power that have now put us in a no win situation. Over the last, several years policies have surfaced that are foreign to a stable society.

The five categories' are in order of importance: Religion, Family, Education, Community, and Government. You need to build from the bottom up as the foundation that is Religion is the most important of the five as without a "real" religion there is no way that a stable world can exist.

Number One Religion

As stated this is the most important category as it sets the stage for morals and if you have no morals, there is nothing to stop you from being a Adolf Hitler (born April 20 1889 died April 30, 1945) a Joseph Stalin (born December 18 1878 died March 5, 1953) or a Mao Zedong (born December 26, 1893 Died September 9, 1976) we do not need people like these.

However, I think that there are a great many in the current class of bad guys that will exceed what those three evil men did from the 1930's through the 1970's. Obviously, their destruction was not all at the same time. None of these men believed in GOD, they were their own God following the beliefs of Marxism and greed. Including the revolutions that each of those leaders were involved in as well as World War II. A good case can be made for well over 100 million deaths resulting from WW II, there has never been another time as bad as that one except perhaps the end of the Roman Empire. I hope nothing like that every happens again.

Number Two Family

This is the next most important. A family contains a man and a woman bound together in a formal relationship "Marriage" traditionally performed by

a Religious leader up until the 18th century. The main purpose is to have children that they are responsible to raise properly. The continuum of the human race it is required that, on average, a woman needs to have at minimum of 3 children. In the distant past more children were required because of little to no health care and poor living conditions. Other kinds of relationships are also possible but they are not part of the continuance of the human race so they are not relevant for maintaining the race. However, that being said, they are still human beings and still have all the same rights that all the rest of us have.

Marriage licenses came about when society became more complicated especially with private property that didn't exist in the past. They were first used in what was to be the state of Massachusetts around 1640. By the end of the 19th century, marriage licenses were used in every state. The real reason for the "License" was political as it made it easier for the local towns and cities to track people for census reasons.

Number Three Education

This is the next most important. At the time the country was formed education was mostly done by the church or by home schooling from the bible. This would have been the Geneva Bible an early English translation of the catholic Latin bible. Western Civilization was primarily Christian with some Jewish believers. They are known today as the Judo/Christian Religion as they are very related. When the country was formed and independence was gained from England America was one of the most literate countries in the world. As the country grew in population and territory public schools became more prevalent with support for our flag and the belief in our God. Sunday was a day of rest with little to no work and we all went to our churches until well into the 60's. To support these beliefs Blue Laws were enacted in cities and states. The Blue laws were approved by the US Supreme Court. Once we stopped honoring Sunday that is when our problems started. We are now no longer in the ranks of religious countries.

Number Four Community

This is the next most important. People lived mostly in towns that then grew into cities and as the cities grew people of common interests and beliefs' formed sub cities or neighborhoods where everyone had common backgrounds or language. There were Irish areas, Italian areas, French areas English areas African areas Chinese areas. etc. etc. Some areas

were rich and some were poor and after WW II, we started to get a lot of people from Eastern Europe as the communists took over a lot of countries and many people escaped. We called them DP's (displaced persons). As these neighborhoods of a large city developed, churches were built to support the population in their area. Because these areas were mostly small, so the people in those areas acted as monitors for the children as everyone knew what kid belonged to what family. I grew up in this world up to 5th grade and it was a great time to be alive.

The existing neighborhoods were make-up of people of common language or other factors, which today would be called segregation. But it was a voluntary one especially over language and each of these areas, more or less, had a local school which was important especially for 4th grade and younger. Now if money wasn't distributed fairly to the schools that would be a real issue but moving kids around on busses to balance everything out was insane. The kids would spend more time in buses than the school room. When this was done in Cleveland a black woman that worked for me put her child in a nearby Catholic school rather to be bussed, she couldn't be fooled.

Number Five Government

This is the last category of importance. By government, I mean mostly the Federal government. The American government was very unique in the way the founders set it up. The states were responsible for the countries societies comprising the cities and people within those states. Everyday life was properly maintained by the state and local city laws and rules. The city provided a police department a fire department and a service department and had a city council and zoning laws. In addition, there were schools with school boards. The state was also involved in larger issues at the state level but also the state tried to maintain uniformity among the various cities. Every state had similar laws and rules but there were also differences. And people were able to move to another state if they wanted to as each state had different advantages and disadvantages. **The states were primarily responsible for the citizens by the constitution. If the Federal government had that power, we would a tyranny.**

The federal government was responsible for maintain the security of all the states and insuring that the states didn't make movements between the states difficult nor block trade between them. For protection from other countries,

we had an army an air force a navy and the marines. There were very few agencies and department at the end of WW II and the constitution was still mostly intact.

Was the country perfect, of course, not, it was comprised of people and politicians and we are not perfect so how could any government be perfect? Changes being made now are not good and unless stopped we will seas to be a constitution Republic within 8 years. The 2024 election is our last chance to fix things.

Current situation as of March 2024

Number One Religion

Religion has always been a problem throughout history for rulers unless they claimed they were GOD. The Judo Christian religion has been more beneficial than most others but it also has its problems. The catholic Pope definitely is a believer in socialism which is just another name for Marxism. Today's, American politicians have a major problem with our Declaration of Independence, the Constitution and Bill of Rights. As they clearly express and show that our "rights" come from our God not from our Elected Representatives.

If we lose our belief in God then we lose the Constitution and the Bill of rights. The politicians in power at that instant of time will then be for all practical purposes "Dictators" no different than the terrible three Adolf Hitler, Joseph Stalin, and Mao Zedong from the World War II era.

That must not happen.

The deep state and the neocons have now taken over the US government. Therefore, we are very close to losing our republic happening here in America and the only person that can stop that is Donald J. Trump.

From the chapter Serious Future problems on page 41: The following sections apply here: One, Two, Three, Five, Six and Seven.

Number Two Family

The nuclear family has been the corner stone of life in the United States along with the right of private property which proved that Adam Smith was right. The flip side of that is that politicians,

Tyrants and Dictators are just not capable of running complex systems efficiently.

The families that best reflect this are Jewish. They believe very strongly that a Strong Family that properly takes care of their children and see that they are properly educated will produce the best children and discipline is part of that process. That is their secret to their success especially in business. The Chinese are also good at raise children when they live in a free society like America use to be.

Politicians and other rulers don't like competition so what they have done in America is destroying the public education system. The children in the public schools today are getting more and more propaganda not education. The mothers and fathers had better wake up to what is happening as it will not be much longer until we will find we have lost total control of our children as they spend all their time on their smart Phones, and very little time doing their homework.

Two government agendas have enhanced the dumbing down of the education system and these are Climate change and The COVID vaccine. Wokeism including Black lives matter. Cultural Marxism is a word used to sum up all the things that are expected to be believed today in the schools. Little to none of what the schools teach is real.

The web is saturated with government generated misinformation and propaganda and our kids with Smart phones will learn nothing that matters and that will destroy our country.

The only way left now, to save your family, at this point in time, is to home school your kids.

From the chapter Serious Future problems on page 41: The following sections apply here: One, Two, Three, Five, Six and Eight.

Number Three Education

When the country was founded, we had one of the best education systems in the world. We had a very high percentage of the population that could read and write. Many decades later when the progressive movement took hold education changed to propaganda. The first step was to break the link of religion to education after the end of WW II. Next was the creation of the Department of education and the unionization of the teachers. The Dept. of Education allowed the Federal government to control what was and was not taught in the public schools.

It wasn't until the Administration of George H W Bush that we started to see the federal influence in Education with his Thousand Points of Light speech around 1989. Bush also started the Points of light Foundation in 2007. The net result of the federal involvement in education was their total control of what was taught in the schools. By 2020, this brought into public education Critical Racy theory, Transgenderism, the LGBTQ+ community, Drag Queen Events in the schools, Wokeism, climate change, and allowing Transwomen (boys) in to women's sports and locker rooms. But worse, the exclusion of parents to find out what was being taught in the schools to their kids.

At the time, this paper was written in March 2024 the education system in American is 90% of the way to being the system used in the USSR before it collapsed in 1991. That can not be allowed to happen.

From the chapter Serious Future problems on page 41 The following sections apply here: One, Two, Three, Five, Six and Eight.

Number Four Community

After World War II the Germans and Japanese had been defeated, there was a mood of relief that spread across the country and rightly so. We had gone through the great depression and then the WW II the worse war ever fraught on the planet so it was time to relax and enjoy life. This resulted in a lot of social changes with consequences to follow down the road as women now expected a larger role in society besides being responsible for her children. They wanted to be in all the areas of business and government. However, like everything there are two sides to everything so as women moved into the professions, management, and politics they pushed out men. This is not speculation I lived through this period.

The end result of this change was that as the work force expanded and by the principle of supply and demand that drove down wages which resulted in both the husband and the wife needing to work as this trend moved forward. The next result was not good as the children lost out as their mother was gone and they were placed into day care centers or stay at home dads. Women did move up and start earning higher salaries in most cases the same as a man's. The myth that men made more than women was just that a made up number as women typically went into different fields than men and worked fewer hours than men did. The women for the most part still wanted to be with their kids.

The result of this change weakened the nuclear family giving more power to the government with Day care, maternity leave, and schools systems teaching kids more than the 3 R;s Reading Writing and Arithmetic. The upper class and the top of the middle class probably got though most of this change but the bottom end of the population didn't fare as well especially after the manufacturing in the country started to move off shore.

From the chapter Serious Future problems on page 41: The following sections apply here: One, Two, Three, Five, Six and Nine.

Number Five Government

The current situation in American government results from the saying that power corrupts and absolute power corrupts absolutely. We have now reached that state. The weakness in any governmental system is the ability of the citizens to control voting at the local level. If that can't be done and it isn't being done today than as, Stalin said "Those who vote decide nothing. Those who count the vote decide everything." We found that out in spades in 2020.

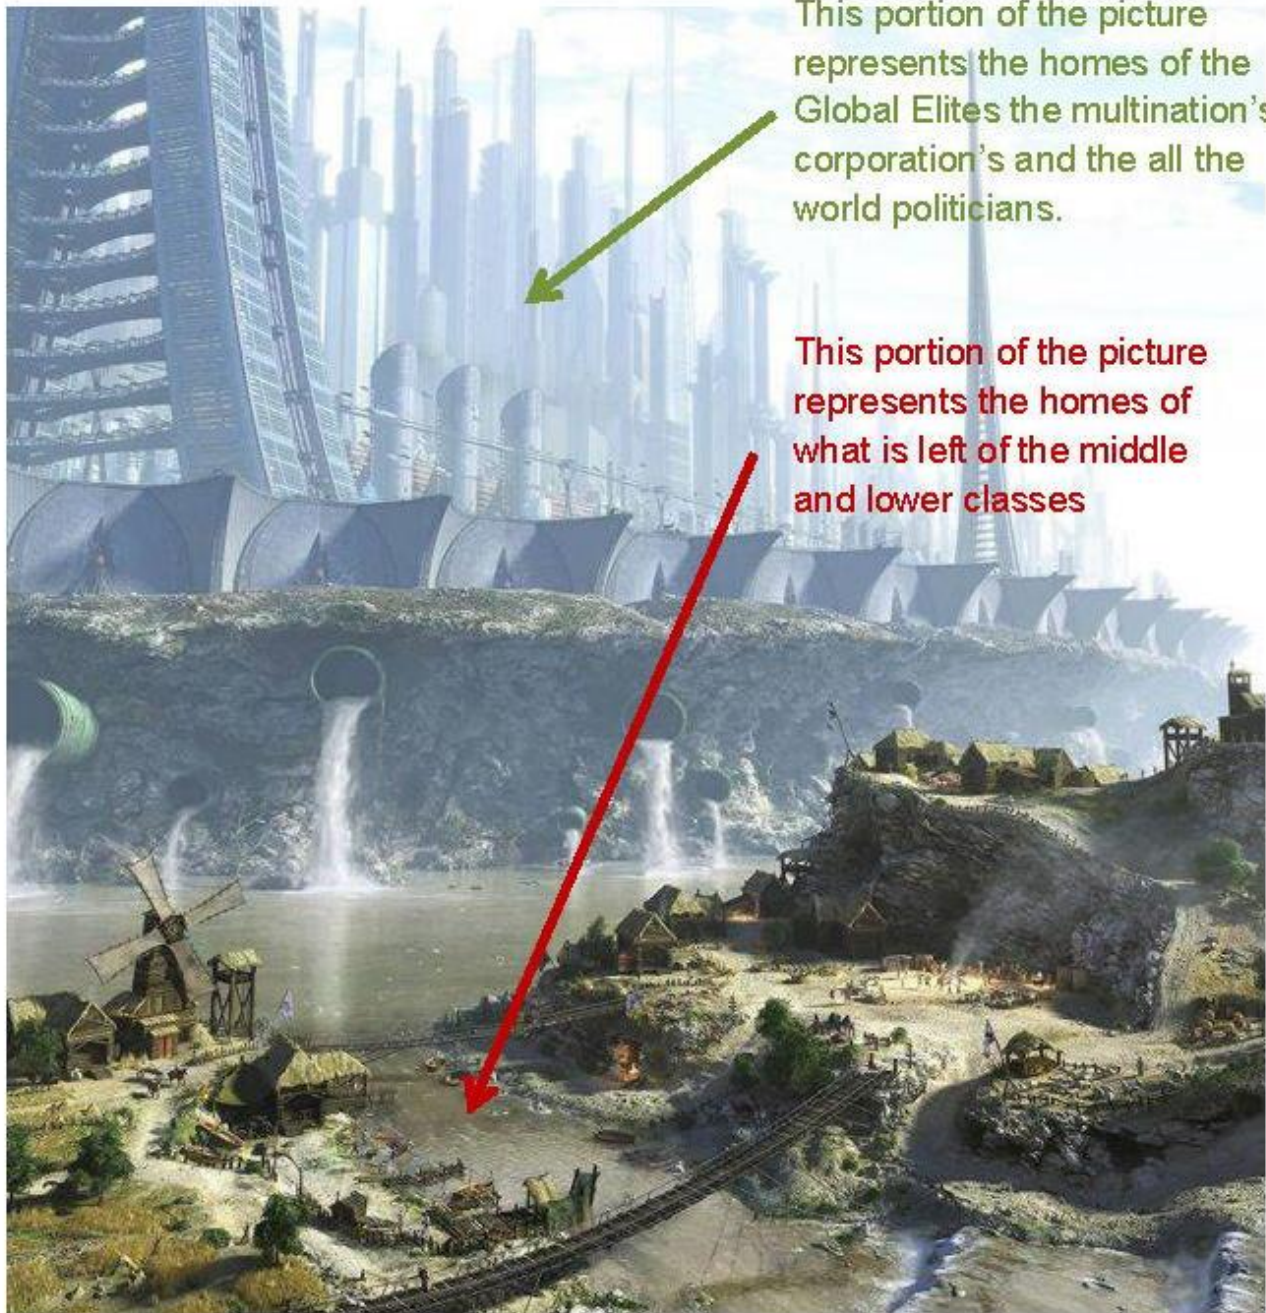

The 2020 elections was stolen and the proof is solid for no other reason than, no other President in history that got significantly more votes the second time then the first time has lost the second election. Reason alone indicates something was very, very wrong. This is especially true when the other candidate hid in the basement during the campaign. But the icing on the cake was that the vote process wasn't one day but many days before Election Day and even more days after the election. Mail in ballots and other methods of finding ballots is how the election was stolen.

The democrats (now really the Marxists) and a good portion of the Republicans (now really the Rinos) have teamed up ever since 9/11 for the purpose of changing our form of government, as they don't like having the citizens having power over them by voting them either in or out. They will now do anything to stay in power including having dead people vote, having people that have moved still on the record to vote where they moved from, having the voting machines rigged to change votes from one person to another, and to have thousands of ballots printed and marked for the candidate they want to win run through the machines sometimes more than once, Shutting down polling places in areas where they do not want the vote counted because of some unforeseen problem that made it impossible to vote, Some of these vote changing events are done by the voting machines being connected to the web, keeping the

opponents poll watchers out of the pooling counting process. And lastly, by taking multiple days to count votes until they find enough votes to get the win they wanted.

From the chapter Serious Future problems on page 41: The following sections apply here: One, Two, Three, Four, Five, Seven, Eight, Nine, and Ten.

This is what the world that Klaus Swabs World Economic Form will look like and for us to live in when he is done

This portion of the picture represents the homes of the Global Elites the multinational's corporation's and the all the world politicians.

This portion of the picture represents the homes of what is left of the middle and lower classes

Summation

What I have written about here is to the best of my knowledge a very reasonable assessment of our current situation here in America and the world. My opinions are constant with many other people that have tried to figure out what the heck is going on in the world, has everyone gone crazy?

I do believe that my age helped me with this analysis as I have seen everything that happened in the country from WW II to today; and I have taken courses in just about every relevant subject like climate, business, and economics. Further 4 years in the military and most of it was either special operation or military intelligence. My point is that not many people have the background to objectively analyze this issue, called critical thinking, of what is going on in the country today,

And I'll say one more thing. In our country, we have always had a diverse population unlike most of the rest of the world. Our language maybe English but there are people here from every European country and many from the rest of the world all coming here legally. Most of those people learned English and became citizens and after a couple of generation they were no different than any other citizen, they were Americans. No other country in the world could say that until we decided under President Johnson to change the rules and now we allowed two languages English and Spanish. Then after Obama that exploded into what we have today.

Even voting ballots are now printed in multiple languages. If they can't speak English, how can they be citizens?

All these changes that have accrued since WW II have mostly been bad and now we no longer HAVE A COMMON CULTURE!

Without a common culture, you cannot have a functioning society based on a government that is a Republic; but you can have a tyranny or a dictator as they have total control of everything.

That is where we are today and I don't know any way that we can continue as a Republic.

At best, the country will split up into a series of independent States. Which would probably, be at least 5 or 6 in my opinion.

At worst we will be in a nuclear war WW III this picture is showing small tactical nukes not the really big ones.

I pray to God that I am wrong

David J. Pristash

Annex

Complete listing from 471 BC

Complete Background time line of **Climate**, **COVID**, **Economics**, **Government**, **War**, **Marxism**, **Philosophy**, and **Technology** that created what we are experiencing today in 2024.

The Art of War Sun Tzu 1910 Translation by Lionel Giles written between 776 BC to 471 BC

Aristotle The Politics Translated by Carnes Lord 1984 Written ~380 BC

The Republic of Plato translation Allan Bloom 1991 written ~375 BC

The Prince Niccolo Machiavelli 1992 written in 1513

Invention of the side rule concept by Edmund Gunter in 1620's and the modern slide rule in 1632

First simple steam engines mostly pumps late 16th Century

Two Treatises of Government John Locke Edited by Peter Laslett 1960 written in 1689

Stationary power steam engines in factories 17th Century

The Spirit of the Laws Montesquieu Edited by Cohler, Miller & Stone 1989 written in 1748

The Theory of Moral Sentiments by Adam Smith published in 1759

An Inquiry into the Nature and Causes of The Wealth of Nations by Adam Smith published in 1776

Declaration of independence and Revolutionary war 1776

Signing of the United States Constitution creating the Republic occurred on September 17, 1787

The Bill of Rights containing 10 amendments to the Constitution Ratified December 15, 1791

The War of 1812 to 1815 was a result of the British interfering with American trade with France during their revolution.

First internal combustion engines late 17th Century

Charles Xavier develops the first practical mechanical calculator in 1820

Steam power locomotives and boats 18 Century

The Communist Manifesto by Karl Marx published 1848

The Civil War to end slavery Day by Day an Almanac 1861 – 1865 E. B. Long with Barbara Long published 1971

On The Origin of the Species by Charles Darwin published in 1859

Capital Volume I by Karl Mark published 1867

First commercial generation of Dc electricity by steam in New York City in 1882

Capital Volume II by Karl Mark Published by Engles 1885

Herman Hollerith develops the punch card and a mechanical device that could calculate in the late 1890's

Capital Volume III Karl Mark Published by Engles 1894

There were working internal gas and diesel engines in cars and trucks by end of the 19th Century

Use of AC power and long distance transmission began in the early 19 hundreds and is the system we use today.

First airplane with IC engine flown by Wright brothers on December 17, 1903

Creation of the Federal Reserve System in 1913

16th Amendment to Constitutional allow a head tax (income tax) in 1913

17th Amendment to Constitutional for direct election of Senators in 1913

The Great War (WW I) 1914 to 1918

First use of airplanes in the Great War

Toward the end of WW1 the communists took over Russia in 1917 and killed the Czar and all his family and created a Marxist state by 1927.

Margaret H. Sanger opened first birth control clinic in 1916 which became Planned Parenthood in 1921

The start of the Eugenics movement in the US was between the 1920 to 1930 and was based on Darwin theory of survival of the fittest.

19th Amendment to Constitutional women's right to vote in 1920

Science and Marxism (Progressivism) takes off from 1800.s through 1920's

China starts to path to communism in 1921

Creation of the Council on Foreign Relations ` 1921

The scopes Monkey Trial in July 1925 was held in Dayton Tennessee. This was a famous trial about teaching Darwin's evolution over God creating us. It was a show trial to show that evolution proved there was no God needed.

Stalin took over Russia in 1927 and created a hell on earth until he died in 1953 as documented in the Gulag Archipelago series written by Aleksandr I. Solzhenitsyn and released to the world in the 1970's.

After decades of research over twenty years what would be the first all-electronic television was demonstrated in Japan in 1926 by Kenjiro Takayanagi

Creation of the Bank of International Settlements (BIS) 1930

Creation of the Technocracy group at Columbia University in 1932

Brave New World Aldous Huxley published 1932

FDR creates Social Security system 1935

The General Theory of Employment John Maynard Keynes interest and money published 1936

By the 1940's the Punch card system was fully developed into electromechanical devices that were what we call computers today and IBM was born,

By the start of WW II airplanes were made of metal with a single wing with single or multiple engines and able to fly at high altitudes and over 400 MPH

World War II 1939 to 1945

The first atomic bombs were used to end the war

By the end of WW II the first jet engines were flying

Creation of The World Bank in Bretton Woods in 1944

Animal Farm George Orwell 1945

Creation of the International Monetary Fund (IMF) 1945

Mao Zedong and the CCP take over China and the survivors of the war are driven to Taiwan in 1949. From then to the 1990's China used a system of government much like that of Russia.

Everson v. Board of Education Supreme Court rules public money could not be used to bus kids to religious schools 1947

Formation of the USA Central Intelligence Agency in by Harry Truman 1947

Psychology of the Unconscious by C. G. Jung published in 1947

Delusion And Mass Delusion By Joost A, M, Meerloo published in 1949

1984 George Orwell published in 1949

Korean War 1950 to 1953

First generation of electricity by atomic power on December 20 1951

First commercial Digital computer became operation in 1951 in England called the Ferranti Mark 1

Nucleic acid double Helix James Watson and Francis Crick 1953

My Background, Short Version

This is needed for clarification for my justification for being knowledgeable in the subjects that I write about.

I was born on January 7, 1941 83 years ago so I have lived through WW II, the Korean War, The Vietnam war, The Cold War, 9/11/01, The War on terror and now the Beginning of WW III. I have a degree in economics with a 4.0 GPA of 30 hours in economics. I paid for most of my college expenses by designing and building automation equipment for a Cleveland company. I have a Masters from CASE with a 3.7 GPA, I was in the army for 4 years, I was a Green Beret (best of the Best), and my last assignment was on the Generals staff at Ft Campbell as deputy Post G2 final rank Captain. In the private sector after getting started at the bottom, as a setup man and assistant foreman (AT 19) but it wasn't long before I was at or near the top. I was mostly a Vice President, a CEO, a Director, or President of the company I worked for.

Back in the 1950s, my family got nothing free even though we were barely middle class. I started working setting pins in a bowling alley in 4th grade; it was only a few blocks down the street. By my senior year I was an apprentice Carpenter working for my uncle and by college, I was working in a factory as a setup man which led to building automation equipment for them. I did get help from my parents but I did pay for most of my college myself and I had a car.

After my 3 years and 10 months in the army, I got into the GE manage program in Schenectady New York where I got a two year degree on manufacturing management as GE made a lot of stuff back then. I worked in two divisions one made Electric garden tractors the other made electric locomotives but after seven years with GE I left to get back to Cleveland when my family and my wife's family were, and we now had 4 kids and I was trying to get a more stable work association, and I thought being with family should help.

After working for three companies and buying the house I am in now, I had enough of the corporate world, so I started a company in Cleveland in 1982, and used my Army benefits to get my masters at CASE in the 2 year Executive management program. Since the program was for upper management and I didn't have a job I focused on how I was going to start the company and raise the money to do so. It was a good program and about the same time I graduated from CASE, I raised all the money I need and I was off and running, well almost.

I found a location and started to set up the company, I had acquired most of the equipment for a machine shop and put that into the new company. Then I designed the machine to make the product and built the machine. I also had hired 6 people and set up the marketing program. While this was going on, I had my first Board meeting which changed everything.

When I raised the money it was mostly from the MA Hanna Co in Cleveland and I negotiated the deal with the company CEO himself and I was off and running with several other investors, Unfortunately the person I made the deal with retired and his replacement was an ass hole and had this first board meeting his representative a VP told me that I was supposed to run the company for positive cash flow.

Positive cash flow means that sales minus cost of sales minus all operation costs (Overhead) have to be positive. Now since I had no sales and was spending money to build the machine to make the product to get the sales it was impossible to be cash positive. So I knew I was in a hostile relationship.

I had two major markets targeted one was a medical product that would require a long time to get approved for sales. There was no question I would get the approval but that was years in the future. The real market to make money was backing for computer monitors in particular portable computers i.e. lap tops which were just being developed. This was in 1986. And I had a source at IBM that gave me their prototype lap top to play with.

When I had everything set up, I presented it to the board and one of the board members voted against the program as they felt there would never be a market for lap top computers. I should have known I would be dealing with idiots so I resigned my position in the company and decided I would never work with anyone in upper management again. This was in 1987.

I sold some of my stock to them and started a new family business which I ran until 2006. I don't remember the exact time but in that 06/07 time frame I found out in a major lawsuit where I was called as an expert witness that the tech I developed was sold off by the edits at my old company to another company that took it to market and made tens of million on it and I guess my design idea was on most computer screens portable and desk top until about 2010 or so.

They did bring the medical product to market, it's called the Bili-blanket, and it's used for the treatment of high bilirubin in new born infants. The company is now a very small company on the west side of Cleveland.

Now back to the subject of this paper. While all this was going on, I was researching the Vietnam War so I could write a book about my time there. That was accomplished but along the way, I learned a lot about politics and science that I never dreamed would be possible in America. I did have issues with politicians but not science until 2005 when I attended an energy seminar at CASE, which opened my eyes to what science, was doing with energy and Climate.

Since I took a course on Geography and climate in collage, I knew the basics and what was out there with Al Gore's book *An inconvenient Truth* made no sense. Well it didn't take long to do research as the web had not been taken over yet and the bottom line was there was no evidence that what was claimed that the world being destroyed was true. There was only information that things were getting better.

It a very easy process numbers on energy flows and sources and there is no way to provide enough energy by wind and solar to sustain the number of people in North America without coal oil and natural gas. You cannot make the numbers work. However I also found that Bill Gates the child of eugenics parents that be solution is to reduce the number of people to what can be sustained be wind and solar. He even gives TED talks on it. However, his talks have been changed maybe around 2018 or so with all the old one removed and in their place new one that are more obtuse with the reduction of the population narrative.

I have 8 issued patents and one more on the drawing board. I am a member of the Beta Gammon Sigma association. There is a lot more but that is

sufficient. And lastly, my personal private library has close to a thousand relevant books to this paper. I am very good at seeing solutions to problems in the fields I have studied because of my background.

This is me six years ago in 2018 in uniform for an event where I was speaking
